OCUHOME CLINICAL EYE CARE

CORPORATE EYE CAMPS & EMPLOYEE VISION CARE

Comprehensive On-Site Ergonomic Vision Screenings for Modern Workplaces in India

Figure 1: On-site vision screening conducted with calibrated portable auto-refractometer

Executive Summary & Clinical Philosophy

Modern knowledge workers face high digital display loads leading to asthenopia (eye strain), uncorrected refractive errors, and accelerated dry eye symptoms. Our corporate eye camp program brings hospital-calibrated primary screening directly into your enterprise campus or regional office.

Key Operational Pillars:

- **Non-disruptive, organized 15-minute examination slots per employee.**
- **Fully qualified, degree-holding optometrists deploying calibrated portable refractometers.**
- **Dual-tier clinical oversight: Remote ophthalmologist review of complex refractive or retinal flags.**
- **Transparent triage: Immediate referral pathways to tertiary eye hospitals for surgical or urgent care.**

SECTION 1: CLINICAL SERVICES OFFERED DURING CORPORATE CAMPS

1.1 Workplace Vision & Ergonomic Assessment

Every corporate camp is configured to match organizational scale and employee health priorities:

1. High-Precision Visual Acuity Testing

Distance and near visual acuity measured using illuminated LogMAR / Snellen optotypes under standardized lighting conditions to identify uncorrected myopia, hyperopia, and astigmatism.

2. Objective & Subjective Refraction

Conducted with calibrated handheld auto-refractors and portable trial lens sets. Employees receive accurate, verified spectacle prescriptions for standard and computer-distance glasses.

3. Digital Eye Strain & Dry Eye Evaluation

Assessment of tear film break-up time (TBUT), blink rate awareness, and ergonomic screen-distance recommendations tailored to the employee's specific workstation setup.

4. Glaucoma & Pressure Baseline Triage

Non-contact / rebound tonometry available for senior staff and employees over 40 to identify elevated intraocular pressure (IOP) that may indicate early, asymptomatic open-angle glaucoma.

5. Eye-Health Awareness Seminars & Workshops

Interactive 30-minute presentations led by optometrists covering the 20-20-20 rule, blue-light reality, proper contact lens hygiene, and nutrition for long-term retinal health.

6. Anonymized Corporate Wellness Analytics

HR and medical officers receive an aggregated, anonymized report summarizing workforce refractive prevalence, ergonomic risk factors, and recommended institutional lighting improvements.

Clinical Scope Boundary Disclaimer:

Corporate eye camps provide non-invasive primary vision screening and refraction. They do not constitute a full hospital surgical evaluation. Employees presenting with suspected retinal disease, cataracts, or severe IOP are referred to clinics.

SECTION 2: FOUR-STAGE IMPLEMENTATION METHODOLOGY

Stage 1: Share Your Requirements & Workforce Profile

The corporate HR team or facility administrator connects with our institutional desk to specify:

- **Office locations, total headcount, and operational shift timings.**
- **Expected participation rate and preferred camp duration (single-day or multi-day).**
- **Dedicated room requirements (a quiet conference room or training hall with standard power sockets).**

Stage 2: Plan Scope, Staffing & Digital Slot Scheduling

We develop a tailored operational plan ensuring zero office downtime:

- **Online pre-registration link provided to employees for self-scheduling 15-minute slots.**
- **Allocation of verified optometrists and clinical support assistants based on throughput.**
- **Mobilization of calibrated diagnostic kits, sanitized trial frames, and protective consumables.**

Stage 3: Professional On-Site Execution

On the scheduled camp dates, our certified clinical team manages the full workflow:

- **Rapid, hygienic employee check-in and digital visual history recording.**
- **Complete refraction and anterior segment screening in a comfortable, professional manner.**
- **Immediate issuance of digital prescription notes and ergonomic guidance.**

Stage 4: Post-Camp Reporting & Specialist Referral Support

Care continues beyond the camp conclusion:

- **Employees requiring secondary ophthalmic care receive direct referral documentation.**
- **Optional home-visit extension for leadership teams and dependent aging family members.**
- **Aggregated executive health summary provided to corporate medical and HR leadership.**

SECTION 3: ORGANISING YOUR CORPORATE VISION CAMP

Checklist for Corporate Organisers

To initiate a corporate proposal, please have the following information available:

1. Primary Office Address & Campus Location (Metro city and neighborhood).

2. Approximate Employee Count to be screened (typically 40–60 employees per optometrist per day).

3. Target Dates or Preferred Month (e.g. Health & Safety Month, Annual Wellness Drive).

4. Facility Availability: A clean, quiet indoor room (approx. 10×10 ft minimum) with ambient light control.

REQUEST A TAILORED CORPORATE PROPOSAL

Our corporate health desk responds with a structured proposal within 24 business hours.

Institutional Health Coordinator:

- **Toll-Free Corporate Desk: 1800 209 4393 (Mon–Sat, 8:00 AM – 7:00 PM IST)**
- **Official Corporate Email: corporate@ocuhome.in**
- **Online Proposal Portal: www.ocuhome.in/corporate-camps**

Registered Office: OcuHome Clinical Eye Care Systems Pvt. Ltd.
Serving Enterprises Across Delhi NCR, Mumbai & MMR, Bengaluru, Hyderabad, and Pune.

Clinical Quality & Safety Standards:

- Practitioners hold university degrees in optometry (B.Optom / M.Optom) and state council registrations.
- Medical instruments comply with ISO/CE optical standards and undergo documented calibration protocols.
- Patient data is handled in strict compliance with the Digital Personal Data Protection Act (DPDP) and DISHA guidelines.
