OCUHOME CLINICAL EYE CARE SYSTEMS

CORPORATE EYE CAMPS & EMPLOYEE VISION CARE

Hospital-Calibrated On-Site Ergonomic Vision Screenings for Modern Workplaces in India

Delhi NCR • Mumbai & MMR • Bengaluru • Hyderabad • Pune

Figure 1: On-site vision screening conducted with calibrated portable auto-refractometers at an enterprise campus

Executive Summary & Clinical Philosophy

Modern knowledge workers face high digital display loads leading to asthenopia (eye strain), uncorrected refractive errors, and accelerated dry eye symptoms. Our corporate eye camp program brings hospital-calibrated primary screening directly into your enterprise campus or regional office without disrupting operational workflow.

Key Operational Pillars:

- **15-Minute Organized Slots:**
  Fast, non-disruptive employee bookings ensuring zero office downtime.
- **Degree-Qualified Optometrists:**
  University-trained clinicians (B.Optom/M.Optom) operating calibrated portable equipment.
- **Dual-Tier Clinical Governance:**
  Supervising tele-ophthalmologist review and digital countersignatures for all encounters.
- **Direct Tertiary Referral Protocols:**
  Transparent transfer documentation to secondary/tertiary eye hospitals when pathology is detected.

SECTION 1: CLINICAL SERVICES OFFERED DURING CORPORATE CAMPS

Hospital-Grade Primary Vision Diagnostics Configured for Workplace Campuses

1.1 Comprehensive Workplace Diagnostic Modules

Every corporate camp is configured to match organizational scale and occupational health goals. Diagnostic suites are deployed with full sterilization protocols and calibrated optical hardware:

01 Visual Acuity Testing

Illuminated LogMAR / Snellen optotypes under standardized ambient illumination for distance and near vision to detect uncorrected refractive errors.

02 Objective & Subjective Refraction

Conducted with calibrated handheld auto-refractors and portable trial lens sets. Employees receive verified spectacle prescriptions for computer monitors.

03 Digital Eye Strain & Dry Eye Triage

Assessment of tear film break-up time (TBUT), blink rate awareness, and personalized 20-20-20 ergonomic screen-distance adjustments.

04 Glaucoma Tonometry Baseline

Non-contact rebound tonometry using sterile single-use probes for staff over 40 to identify asymptomatic intraocular pressure (IOP) elevation early.

05 Ergonomic Vision Workshops

Interactive 30-minute seminars led by optometrists covering digital display ergonomics, blue-light evidence, contact lens hygiene, and eye health.

06 Anonymized Workforce Analytics

HR and Chief Medical Officers receive an aggregated corporate report summarizing refractive prevalence, dry eye risk factors, and lighting advice.

Clinical Scope Boundary & Medical Governance:

Corporate eye camps deliver non-invasive primary vision screening, refractive assessment, and ergonomic advice. They do not constitute a full surgical evaluation or replace hospital slit-lamp biomicroscopy. Employees presenting with suspected retinal pathology, advanced cataracts, or intraocular hypertension (>21 mmHg) are provided immediate referral documentation to accredited secondary or tertiary ophthalmic hospitals.

SECTION 2: FOUR-STAGE IMPLEMENTATION METHODOLOGY

A Seamless, Zero-Downtime Execution Model Designed for Enterprise Campuses

2.1 End-to-End Enterprise Camp Lifecycle

Our structured operational roadmap ensures predictable clinician throughput, respectful employee scheduling, and complete data integrity from onboarding through post-camp executive reporting:

STAGE 1 : Requirements & Workforce Profiling

- Headcount & Location Scoping: Define campus locations, total employee population, and shift timings.
- Facility Sizing: Identify quiet indoor room (approx. 12x10 ft minimum) with ambient light control and standard 230V sockets.
- Diagnostic Tier Selection: Customize specialized testing modules including tonometry and ergonomic seminars.

STAGE 2 : Staffing Calibration & Self-Service Slot Booking

- Self-Service Pre-Registration: Custom corporate booking link allowing employees to self-select 15-minute slots.
- Clinical Team Assignment: Verified optometrists and clinical support assistants assigned based on target throughput.
- Equipment Mobilization: Certified, calibrated portable auto-refractor suites and sanitized trial frames dispatched.

STAGE 3 : Professional On-Site Camp Execution

- Hygienic Check-in: Contactless employee check-in and digital visual history recording.
- Comprehensive Testing: Distance/near visual acuity, auto-refraction, trial frame verification, and tear film check.
- Immediate Outcomes: Verified digital spectacle prescriptions and tailored ergonomic advice delivered on-site.

STAGE 4 : Post-Camp Reporting & Referral Continuity

- Specialist Hospital Referrals: Fast-track transfer documentation for staff requiring surgical or tertiary consultation.
- Aggregated Executive Analytics: Anonymized workforce ocular health summary delivered to HR and Medical Officers.
- Family Care Continuity: Optional at-home comprehensive eye examination vouchers for dependent aging parents.

Checklist for Enterprise Health & Wellness Organisers

[1]	**Primary Office Campus:**	Physical address, multi-building distribution, and visitor security protocol.
[2]	**Workforce Population:**	Target headcount (calibrated at 40–60 employees per optometrist per day).
[3]	**Preferred Dates:**	Target execution dates or wellness month (e.g., Annual Health Week drive).
[4]	**Room Allocation:**	Quiet conference room (min. 12x10 ft) with ambient lighting control and power points.
[5]	**Supplemental Options:**	Executive senior home visits, glaucoma pressure screening, or wellness webinars.

REQUEST A TAILORED CORPORATE PROPOSAL

Our institutional health desk compiles tailored camp proposals with throughput estimates within 24 business hours.

- **Toll-Free Corporate Desk:** 1800 209 4393 (Mon–Sat, 8:00 AM – 7:00 PM IST)
- **Official Institutional Email:** corporate@ocuhome.in
- **Online Proposal Portal:** www.ocuhome.in/corporate-camps
- **Registered Corporate Entity:** OcuHome Clinical Eye Care Systems Pvt. Ltd., New Delhi, India
- **Active Operational Hubs:** Delhi NCR • Mumbai & MMR • Bengaluru • Hyderabad • Pune

Clinical Quality, Data Protection & Regulatory Compliance:

- **Degree-Qualified Optometrists:** Every attending clinician holds a university degree in optometry (B.Optom / M.Optom) and active council registratio
- **Calibrated Instrumentation:** Portable auto-refractors, tonometers, and trial lenses comply with ISO/CE optical standards and documented maint
- **Statutory Data Protection:** Employee health information is managed in strict compliance with the Digital Personal Data Protection Act (DPDP)
